## Product Application Sheet – TRIPLE 7 ENVIROCLEAR

### ***Say good bye to waste water odours!***

**Triple 7 EnviroClear** improves effluent and septic system drainage, enhances water flow, restores efficiency eliminates odours, assists with solids breakdown and saves on expensive pump-outs.

TRIPLE 7 EnviroClear is an effective, quick acting, bio-based product that cleans while destroying odours. It is used for removing grease and fat deposits.

#### **Applications Septic Systems & AWTS (Aerated Waste Treatment Systems)**

Dose initially with 250ml (1 cup) per day of concentrated product into toilets, sinks or drains for the first four days. Add 1 cup (250ml) of TRIPLE 7 EnviroClear weekly to maintain treatment and system efficiency.

#### **Odour Control in Drains, Grease Traps & Septic Tanks**

Add 250ml per day to plumbing system until odour free. Thereafter 250ml weekly for system maintenance.

#### **Portable, Camping and Caravan Toilets**

Add 10ml (1 cap) per litre of waste in holding tank. Alternatively add 250ml shared between each drain point.

#### **Composting, Disposal Bins & Garbage Compactors**

Apply by spraying or misting or alternatively pour 250ml onto surface.

Product Contents: Non-ionic surfactants, fatty acids, linear alcohols and botanical buffering agents.

**TRIPLE 7 EnviroClear** does not contain toxic additives such as caustics, phosphates, strong acids, petroleum products, terpenes, glycol ethers, lauryl sulphate, oxalic acid & ammonium compounds.

## Product Application Sheet – TRIPLE 7 ENVIROCLEAR

Q. **What is EnviroClear?**

A. EnviroClear is an organic septic and odour treatment.

Q. **How much will I use?**

A. For ongoing problems, add 250ml per week into the septic tank, or 10ml for every litre into a waste water tank or caravan toilet. For occasional odours or flooding of septic systems, add one cup as needed.

Q. **How does it work?**

A. It works by assisting the breakdown of solids in septic tanks to save on pump outs and helps your system performance.

Q. **How long will a bottle last?**

A. 20 litres will last up to 20 months (250ml per week) in normal use conditions.

Q. **Will it help remove the smell?**

A. EnviroClear will eliminate odours in wastewater tanks eg. grey water, septic tanks and caravans.

Q. **Will it clear blocked pipes?**

A. Yes, it will clear blocked pipes and improve drainage and clogging problems in drains & soak wells.

Q. **Will it remove fats and greases?**

A. Yes, it clears pipes of organic deposits and assists grease trap function and odours.

Q. **Is it safe to use?**

A. Yes, it is environmentally responsible, non-toxic, non-corrosive, non-hazardous and totally organic.

Q. **Is it easy to use?**

A. EnviroClear liquid requires no mixing.

Q. **Is it guaranteed?**

A. Yes, it has a money back performance guaranteed.

Q. **Where is it made?**

A. EnviroClear is made in Australia.

## 1. SEPTIC SYSTEMS AND AERATED WASTE TREATMENT SYSTEMS

Septic problems generally arise because of an imbalance between the natural bacteria that digest waste and the amount and type of waste they consume. Inefficient septic / waste systems can be expensive to rectify and also cause many health issues.

### Causes of problems

Septic overload - High use of facilities eg. Public toilets, mine sites and factories.

Grease deposits - Restaurants, food processing and canteens.

Harsh cleaning chemicals - Kill desirable sewer bacteria.

### How TRIPLE 7 EnviroClear solves the problem.

TRIPLE 7 EnviroClear is a unique surfactant formulation that destroys odours and breaks down built-up grease and fat deposits, allowing them to be released from the system. TRIPLE 7 EnviroClear cleans and deodorises drains before they enter the septic system, and improves drainage in leach drains and soak wells. When TRIPLE 7 EnviroClear is used instead of harmful chemical products, it restores maximum efficiency and maintains aerated waste treatment and septic systems in optimum working condition.

### BENEFITS

- > Improves drainage and clogging problems in leach drains & soak wells.
- > Clears blocked pipes
- > Destroys odours
- > Stimulates septic tank function
- > Reduces plumbing costs
- > Improves water flow
- > Lowers health risks
- > Saves money
- > Protects waterways & ecosystems.

### Dilution Rates

Dose with an initial application of approximately 250ml (1 cup) per day of the concentrated product for the first 4 days, pouring into toilets, sinks or drains. It is recommended that 250ml of TRIPLE 7 EnviroClear be added weekly to maintain the efficiency of treatment systems.

# Product Application Sheet – TRIPLE 7 ENVIROCLEAR

## 2. GENERAL CLEANING APPLICATIONS

TRIPLE 7 EnviroClear is commonly used in a wide range of environments for general cleaning applications. When used for general cleaning, TRIPLE 7 EnviroClear has flow-on benefits including improved septic tank function and pipework systems along with reduced odours.

TRIPLE 7 EnviroClear leaves hard surfaces clean and odour free without etching or corroding the cleaning surface.

### BENEFITS

- > Reduces salt loadings
- > Helps problem drains
- > Simple to use
- > Odourless and quick acting
- > Can be used in food processing areas
- > No harsh chemicals
- > Water dilutable
- > Cost effective
- > Does not damage rubbers, gaskets and seals.

### Applications

- > Toilets / urinals
- > Shower and ablution blocks
- > Floors, walls, benches and tiles.

### Method of use:

**General Cleaning** – Dilute TRIPLE 7 EnviroClear 1:20 parts with water and apply with a sponge, spray or mop. Rinse with water.\*

**Larger Areas** – eg: animal enclosures and food processing plants. Spray on the product using a 1% dilution (1:100) and follow by a water rinse.\*

**Council and Industrial Applications** – Apply with a pressure spray using a foaming nozzle.

*\* Recommended rates only. Dilution rates depend on severity of the problem and the application.*

# Product Application Sheet – TRIPLE 7 ENVIROCLEAR

## 3. ODOUR CONTROL

TRIPLE 7 EnviroClear is added to effluent tanks, pipework systems, waste bins, drains and grease traps to control odours.

*TRIPLE 7 EnviroClear is not a masking agent....it destroys odours at their source.*

## APPLICATIONS

**Drains, grease traps & septic tanks** - Add TRIPLE 7 EnviroClear to the plumbing system. Promotes bacteria action.

**Hard surface cleaning** - Wash with diluted product eg: walls, floors, benches and ablution blocks.

**Rubbish dump, disposal bins & garbage compactors** - Apply via a misting system or spray applicator.

## Dilution Rates

TRIPLE 7 EnviroClear dilution rates range between 1:20 parts for washdown to 1:100,000 parts for an in-line injection system. Consult your local stockist or the Manufacturer for advice on your particular application.

## **TRIPLE 7 EnviroClear TESTIMONIALS**

“ At our current house, we have a septic tank system which functions well as far as we can tell except for sewer smells during heavy loadings. We use one cup of TRIPLE 7 EnviroClear each time this occurs for immediate odour removal.”

***Householder with new septic tank***

“ We have completely washed out the toilet block at one of our busiest railway stations with TRIPLE 7 EnviroClear and there is no odour what-so-ever. We have never had the odour removed before and the toilet look so clean in such a simple manner. The old concrete tends to hold odours and grime, but TRIPLE 7 EnviroClear has done an excellent job. We now use it for everyday cleaning.”

***State Rail Authority***

“ We have been using TRIPLE 7 EnviroClear to assist in the breakdown of wet well toilet systems and for odour control. We have found the product to be very efficient – only requiring one cup per week. We recently had the system pumped out and there was a noticeable increase in the breakdown of solids.”

***Tank Cleaning Contractor***

“ I am happy to provide a testimonial for the product in relation to long drop and vault toilet applications. It controls and eliminates odours and is simple to use, whilst being very effective.”

***National Park Operator***

“Our hotel business experienced high effluent loadings. Triple 7 EnviroClear was then added to the grease traps and the past, persistent on-going odour issues with a neighbouring hospital were consequentially resolved within 2 - 3 days.”

***Hotel Resort Owner***

“ We operate a Septic Tank/Grease Trap cleaning company. We previously had a problem with odours coming from our suction hoses. Traditional products that we used in the past were either hazardous and not eco-friendly or simply masked the problem with strong fragrances. Recently we trialed TRIPLE 7 EnviroClear at 5% dilution, applied using a simple trigger spray bottle. Very quickly the odours disappeared, except for those coming from inside the hoses. We then sprayed in each opening of the hoses and the odours became virtually undetectable. Now when we arrive at the next job, customers do not detect odours coming from our truck ... a big plus for our business!”

***Liquid Waste Transporter***

## TRIPLE 7 EnviroClear TESTIMONIALS

“ Our company hires out porta-loos for high profile functions. Recently we trialed traditional chemicals in one group and TRIPLE 7 EnviroClear in the other group. TRIPLE 7 EnviroClear reduced odours better than the best traditional chemicals, even when the units were moved from one site to another.”
